Athletes live to compete, but they spend most of their time getting ready for the “big game.” That is why having a high-performance surface in the gym is just as important as the court or the field. The Dropzone line of rubber flooring provides a variety of training surfaces for weight rooms, gyms and fitness centers. Each product is designed for a particular area or application, but they all have one factor in common: “Superior Surface Strength.”

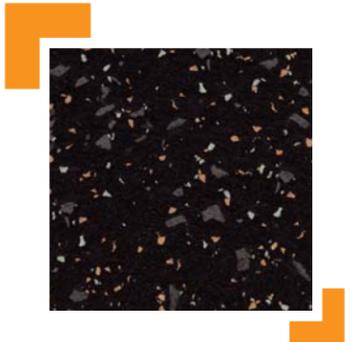

Dropzone

Dropzone is a single-ply, high density floor made of 100% recycled rubber. It is the ideal solution for weight rooms, training facilities and fitness centers. Dropzone is available in either 48” rolls or 24” x 24” interlocking tiles and offers traction, comfort, sound insulation, and above all durability.

Dropzone Speckle

Dropzone Speckle offers the same characteristics as Dropzone with the addition of color. It is made from recycled rubber, but also includes colored EPDM rubber chips. Dropzone Speckle is available in 48” rolls or 24” x 24” interlocking tiles and come in a variety of colors to match any style.

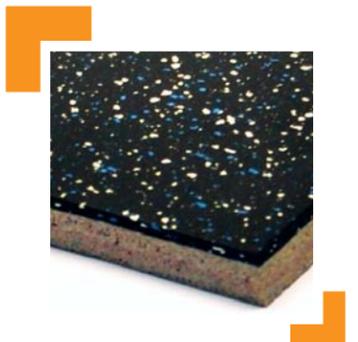

Droptile

Droptile is a one inch thick tile that provides supreme durability and maximum vibration absorption. It provides the perfect level of support for weights or equipment without signs of wear. The elevated profile of Droptile’s subsurface allows wires and cables to be fully integrated beneath the surface preventing cable clutter. The 24”x 24”x1” tiles can easily be installed over any surface with or without the use of adhesive. Droptile is best suited for weight rooms, fitness centers and training facilities and carries a 15 year warranty.

Dropzone Flex

Designed with a speckled finish, Dropzone Flex has a virgin rubber top layer with a layer of recycled rubber underneath. It is available in 48” rolls or 36” x 36” tiles and come in a variety of colors. Dropzone Flex is constructed for superior durability and strength. It is ideal suited for any area where heavy weights and fitness equipment are used as well as ice arenas.

Dropdeck

Dropdeck is a high-impact virgin rubber surface that is durable and skate resistant.* The textured surface offers excellent traction and performance under foot. The force reduction base layer is made from a blend of recycled and virgin rubber formed with a basket weave profile providing comfort. This product is ideally suited for weight room, fitness centers, ice skating arenas, locker rooms, and more.

Product Summary

Dropzone Speckle	48” Rolls	24” x 24” Tiles
Dropzone	48” Rolls	24” x 24” Tiles
Droptile		24” x 24” Tiles
Dropzone Flex	48” Rolls	36” x 36” Tiles
Dropdeck	48” Rolls	24” x 24” Tiles

*10 mm thickness is required for skate resistance.
