EcoPure

1 XF Finish

This surface treatment provides:

- High resistance to soiling and abrasion
- Up to a 30% reduction in maintenance costs and 50% reduction in water, chemicals, and energy used for maintenance

2 Linoleum Core

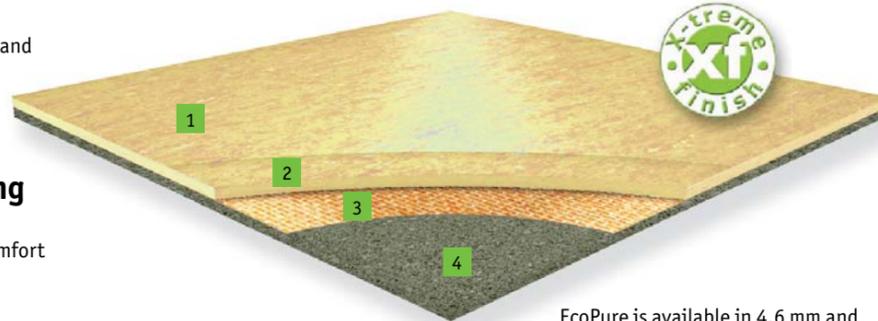

Pure linoleum made with natural raw materials that is naturally bacteriostatic.

3 Jute Underlayment

Natural jute layer providing strength and support.

4 Shock Absorbing Foam Backing

Foam backing for increased comfort and shock absorption.*

EcoPure is available in 4.6 mm and 3.2 mm thicknesses*

All Natural Raw Materials

Limestone

Cork

Linseed Oil

Rosin

Dark Blue

Navy Blue

Grass

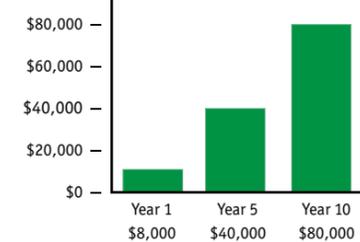

Field Green
(4.6 mm only)

*EcoPure 3.2 does not include foam backing. For shock absorption, a combination system must be used. Ask a representative for details.

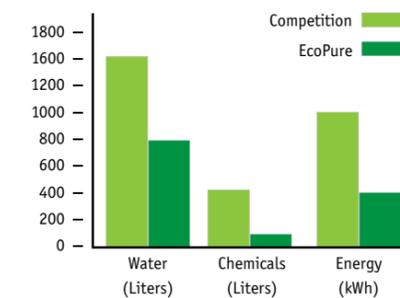

Sustainable sports flooring starts with good design. EcoPure's XF linoleum was awarded the 2009 Green GOOD DESIGN™ award by the European Centre for Architecture Art Design at the Chicago Athenaeum. The reason EcoPure exhibits "good design" is that it functions on many levels. EcoPure is:

- manufactured with natural materials in a Cradle to Cradle Silver certified process
- a soil and abrasion resistant floor that reduces water, chemical, and energy use in maintenance
- naturally bacteriostatic to improve hygienic conditions
- a shock absorbing sports floor that increases comfort

Savings on Maintenance†

Resource Consumption

EcoPure is a unique achievement in sustainable sports flooring. Both 4.6 mm and 3.2 mm thicknesses are certified Cradle to Cradle Silver®. EcoPure 4.6 mm is the *only* Category 1 shock absorbing linoleum (ASTM F2772) to achieve this certification. To achieve this status, a product must provide favorable health and re-utilization of materials, renewable energy use and water stewardship in manufacturing, as well as social responsibility. If you are looking for sustainable sports flooring, there is no need to look further.

†Based on comparison with non-XF treated surfaces in an area of 10,000 sq. ft.
